“Feminism is a method of analysis, meaning its primary concern is with teasing out the processes, structures and substance of life as we know it in order to move us closer to dignified existence. Feminism offers us, not a set of answers, but a means of elucidation. It gives us back the ability to face multiple, overlapping crises via an analysis of the convergent and divergent forces (historical and otherwise) that constitute it.”

The World Must Be Won
Feminist Legacies

Since the #MeToo movement, feminism has become a staple in various contexts. Many people, even in academic circles, are emphasizing the risk of mainstream co-optation due to this situation. However, the danger lies in the fact that today, behind this seemingly righteous radicalism, the signifier ‘feminism’ may lose its political effectiveness in abstract jargon and international solidarity ambitions that remain purely hand-waving. This book brings together prominent figures in contemporary feminism and its radical movements, including Zahra Ali, Rama Salla Dieng, Silvia Federici, Verónica Gago, Lola Olufemi, Djamila Ribeiro, Sayak Valencia, Françoise Vergès. The objective is to step aside and ground the subversive and internationalist aspects of modern feminism in tangible reality. The authors of this collection explore political, editorial, spiritual, and activist experiences from the recent past, seeking to revive their potent significance. Covering topics such as transfeminisms, women’s struggles in Senegal, Islamic feminisms, and Afro-Brazilian religions, the book aims to address pressing issues crucial for emancipatory movements, including combatting systemic violence, engaging in anti-imperialist and antifascist struggles, and politicizing care relationships.

How to Fight Sexual Violence without Turning Violent?
A Postcarceral Feminist View of Justice
Elsa Deck Marsault

In recent years, an increasing number of feminist activists have engaged in anti-prison reflection. However, how to reconcile the #Blacklivesmatter and #Defundthepolice movements with the demand, emphasized since #Metoo, to punish sexual offenses more severely? In this insightful and groundbreaking short book, Elsa Deck Marsault argues that an emancipatory feminism must fundamentally reconsider its attachment to punishment and its concept of justice based on the exclusion of perpetrators. As an activist herself, she vividly and precisely recounts her experiences in mediating within political groups marked by internal crises, accusations of rape or assault, and describes the pitfalls of responses such as straightforward “call out”, ostracism, or harassment against offenders. Rather than focusing on punishment and seeking retribution, the author emphasizes the centrality of support and assistance for victims, the strengthening of community solidarity, and the possibility of dialogue leading to mutual recognition of facts and grievances. This radical plea for genuine transformative justice is a crucial contribution to rebuilding a viable feminist perspective for prison and penal abolitionism.

Kollontai
Undoing the Family and Making Love Again
Olga Bronnikova & Matthieu Renault

Revolutions are known to arouse social and political imaginaries. Alexandra Kollontai, a key figure in the Russian Revolution and the early Soviet government, left a highly emblematic body of work in this regard. Celebrated as a precursor to the sexual revolution, she is, however, often reduced to an expression of feminism deemed too outdated to be relevant today. In this significant book, Olga Bronnikova and Matthieu Renault capture the richness of Kollontai’s thought. Examined in its context, with unpublished primary sources, the Marxist feminist shows a deep engagement in utopian reflection, influenced by Russian literature and confronted by the uneven development of the tsarist empire’s rural areas. Among revolutionaries, she stands out as one who seeks to understand the psyche and its transformations, striving to reinvent an emancipatory morality in a country ravaged by war and famine. Without falling into hagiography, acknowledging Kollontai’s ambiguities and limitations, the authors unfold the complexity of a thought that aims to revolutionize life, not just economic relations. An essential work at a time when radical politics are trying to achieve doable strategies and concrete utopias against systemic oppression.

Reflections on the Commune-form
Kristin Ross

When the State pulls back, the commune thrives. This was as evident in Paris in 1871 as in recent instances of the commune’s resurgence, both in France and beyond. Ongoing territorial conflicts, such as the zad in Notre-Dame-des-Landes or the pipeline occupations in North America, revive ways of claiming social space. They create new ways of living politically that halt the destruction of our environment. These movements also shed light on past struggles like the land-based conflicts of the 1960s and 1970s in Sanrizuka, Japan, or Larzac in southern France, revealing them as defining battles of their time. Additionally, the works of anti-productivist thinkers from the 1970s, such as Maria Mies and Henri Lefebvre, which were grounded in everyday life and its transformation rather than ideology, now serve as a valuable archive of ideas. Within these reflections, essential elements of commune life—defense, sustenance, appropriation, cooperation, diverse solidarity—emerge as crucial aspects of what Marx once termed “the political form of social liberation” and Kropotkin saw as “the necessary framework for revolution and its facilitator.”

Cement Capitalism
An Environmental History of Large-Scale Infrastructure
Nelo Magalhães

Environmental activism is known to challenge extractive infrastructures, but increasingly, it extends to projects involving transportation and urban landscapes, such as roads, airports, and high-speed train lines. The emphasis is often placed on the impact of these initiatives on the biosphere, their costs, and their effects on communities. However, there are few attempts to question the territorial development rooted in concrete, earth-moving, and the artificial manipulation of soils. In a groundbreaking investigation, Nelo Magalhães contends that the widespread use of concrete is a severe symptom of late capitalism. Unlike centuries ago, when urban planning considered soil characteristics, hazards related to humidity, minerals, and geological factors, post-war capitalism has continually refined methods to control soils and shape urban and agricultural spaces. This has resulted in a substantial capital investment in infrastructure and an unparalleled accumulation of waste and debris. Highway facilities, bridges, and concrete surfaces constitute an environmentally unsustainable legacy demanding ongoing maintenance and renovation, adversely affecting the biosphere and soil health. Through compelling examples, the author illustrates that a genuine ecological revolution must confront the formidable influence of concrete, disassemble the «negative commons» embodied by these concrete structures, and devise social frameworks that empower collective control over our spaces.

Astrocapitalism: A History of the Conquest of Space
From Nazi rockets to New Space
Irénée Régnauld & Arnaud Saint-Martin

In a few decades, space conquest seems to have become an unavoidable goal for multibillionaires and the governments of developed countries. Terraforming, manned exploration of Mars, lunar exploitation—in the face of environmental crises, outer space is presented as a panacea. The authors of this thorough work provide, for the first time and decisively, the genealogy of this desire for conquest. Rooted in a colonial and civilizing imaginary, this ambition is initially explored and implemented by Nazi engineers who were repurposed in aerospace in the United States after the war. From the arms race to astrocapitalism, Irénée Régnauld and Arnaud Saint-Martin shed light on the grim appropriation of billions of euros in research and development and of our celestial vault for polluting, speculative, and often illusory purposes. Driven by an imaginary of territorial domination and fantasies derived from science fiction, our world leaders are indifferent to the sustainability of the mass of space objects or the actual feasibility of their wildest projects. Against the false certainties of techno-utopia and its dead ends, the authors invite civil society to reclaim these topics and outline the possibility of a more artisanal, playful, and sustainable approach to space exploration.

Irénée Régnauld is research associate at Compiègne University of Technology.
Arnaud Saint-Martin is a sociologist and researcher at the CNRS.

Literature Beyond Politics
Pierre Alferi, Leslie Kaplan, Nathalie Quintane, Tanguy Viel, Antoine Volodine, Louisa Yousfi

Since the 2010s, it has become a commonplace that art and literature should have political relevance, address the pulse of contemporary issues and societal dynamics. Despite these noble intentions, such a requirement runs the risk of relegating literature to an industry of bland social narratives. It also entails the commodification of endeavors in politicizing fiction and poetry, potentially diluting the genuine essence of literary expression. This collective of authors, all at the cutting edge of French-speaking contemporary literature, have contributed to this short volume in the spirit of writing against the grain. Unconstrained by formats, oscillating between poetry, dialogue, epistolary genre, narrative, essay, and epic poem, the authors embark on a literary and political endeavor far removed from the conventional “engaged” literature so prevalent in our current times. What they convey is a sense that emancipatory literature implies emancipated authors and readers, pushing the boundaries of creative imagination.

Pierre Alferi passed away shortly after writing his invaluable contribution to this book. He published 15 books with P.O.L, translated by Sexto Piso and others.
Leslie Kaplan published over twenty novels with Gallimard, translated by Rowohlt, and others. She was awarded the Prix Wepler and the Prix SGDL.
Nathalie Quintane has published novels and poetry with P.O.L, translated by The White Review and others.
Tanguy Viel has published nine novels with Minuit, translated by Other Press, Neri Pozza and others.
Antoine Volodine has published books with Minuit, Gallimard and Le Seuil, translated by L’Orma, Open Letter and others. He was awarded the Prix Wepler, the Prix Inter and the Prix Médicis.
Louisa Yousfi is the author of Rester barbare (La fabrique), translated by Anagrama, Verso, and others.

Lenin and the Weapon of Language
Jean-Jacques Lecercle

The life and politics of Vladimir Lenin have recently gained more and more prominence in the humanities and philosophy with the return of activism and radicalism throughout the last decade. Yet, as he is remembered primarily as a political strategist and thinker, a crucial part of his legacy is overlooked. Jean-Jacques Lecercle, a philosopher and linguist, proposes in this short and sharp essay to fill this gap: Lenin is also a decisive thinker of language and literary expression. With eloquence and unusual clarity, conveying how important it is to build a radical theory of language in an age of omnipresent information and when all politics has to deal with identities, Lecercle proposes a timely new framework to read Lenin as a political stylist: forging slogans, writing polemical essays and critically assessing artistic and literary creation of his age, from Russian realist novels to futuristic painting. For Lecercle, the intersections of language and politics boil down to political struggle being a form of play, where truth needs to resonate with the social imaginary and the most acute feelings of the times.

Jean-Jacques Lecercle is Emeritus Professor of English at the University of Nanterre. He is the author of, among others, The Violence of Language (Routledge), Badiou and Deleuze Read Literature (Edinburgh UP).

Forgetting Camus
Olivier Gloag
Foreword by Fredric Jameson

Perhaps no other French philosopher and novelist is more celebrated than Albert Camus. His perspective on human life and history as an absurd and tragic condition has proven well-suited to a moderately humanistic ideology and the liberal, compassionate stance of our cultural elites. Olivier Gloag boldly breaks the soft consensus and, in this incisive and provocative essay, provides a detailed and didactic deconstruction of Camus as a contemporary “idol”. Beyond the myth of a committed and yet “reasonable” intellectual, Gloag questions the “in between” position of the one who represented Algeria by erasing the indigenous Algerian population from his novels. He also brings to light an often sidelined aspect of Camus’ existentialist avoidance strategy: the latter’s investment in a toxic form of masculinity and his objectification of women. In an age when postcolonial theory and gender studies reign supreme in the humanities, this pulling down of Camus’ statue proves to be highly groundbreaking and more than timely.

Olivier Gloag is Associate Professor of French and Francophone Literature at the University of North Carolina, Asheville, and Research Affiliate at the Institute for Critical Theory at Duke University. He is the author of Albert Camus, a very short introduction (Oxford UP, 2020).

“The present book develops the background against which Camus’ literary and ideological strategies - agonizing as they may have been - alone become intelligible. They make it impossible to use him as some vaguely liberal and humanist icon, thereby freeing him from manipulation by the political establishment and allowing us to measure the true and complex originality of a historic work endangered by an apolitical propaganda in the service of even more unacceptable anti-political seductions.”

FREDRIC JAMESON

“It was indeed time to go beyond a justified admiration for the work and point out some of the flaws in Camus’ humanism.” CLARO, LE CLAVIER CANNIBALE
“Vergès has written one of the major essays of the new year. Going against the neo-liberal idea that the decolonisation of the Western museum would be impossible, Vergès proposes, in the wake of Frantz Fanon, a powerful reflection that goes through the history of the museum, which has never been a neutral space.” — DIA CRITIK

Decolonizing the Museum
Françoise Vergès

“Decolonization, which proposes to change the order of the world, is a program of absolute disorder,” Frantz Fanon wrote in 1961. Decolonization means hence the abolition of an order that legitimates oppression, enslavement, exploitation, extraction, racism and produces intense suffering. Among the institutions upon which that order rests, the European museum occupies a specific place, promoting a universalism that masks its provincialism. Challenged for decades now by demands for restitution, reparations, diversity, social, cultural and feminist justice, the universal museum has integrated some of these demands. However if the struggles for social and cultural justice must continue and intensify, Vergès argues in this essay that the decolonization of the museum is impossible. A decolonial museum cannot exist in the current context of late capitalism, rising fascistic regimes and the state of permanent war against all forms of living.

After reviewing how the program of absolute disorder is being thought and put into practice, she studies the birth of the universal museum in France. She explores how Napoleon exploited laws that justified and legitimated seizures, theft and looting of arts instituting a politics that became systemic under European colonization. Vergès then turns to the project of the “museum without objects” in Reunion Island that legitimated seizures, theft and looting of arts instituting a politics that became systemic under European colonization. Vergès also assesses contemporary activism, movements and struggles, including #MeToo and the Women’s Strike. Centring anticolonialism and anti-racism within an intersectional Marxist feminism, the book puts forward an urgent demand to free ourselves from the capitalist, imperialist forces that oppress us.

A Feminist Theory of Violence
Françoise Vergès

“In this robust, decolonial challenge to carceral feminism, Françoise Vergès elucidates why a structural approach to violence is needed. If we wish to understand how racial capitalism is linked to the proliferation of intimate and state violence directed at women and gender-nonconforming people, we need to look no further than Vergès’ timely analysis.” — ANGELA Y. DAVIS

The mainstream conversation surrounding gender equality is a repertoire of violence: harassment, rape, abuse, femicide. These words suggest a cruel reality. But they also hide another reality: that of gendered violence committed with masculinity in the service of a policy of death.

In this powerful manifesto, Francoise Verges argues that feminists should no longer be accomplices: it is time to fight the system that created the boss, built the prisons and polices women’s bodies. A Decolonial Feminism grapples with the central issues in feminist debates today: from Eurocentrism and whiteness, to power, inclusion and exclusion. Delving into feminist and anti-racist histories, Vergès also assesses contemporary activism, movements and struggles, including #MeToo and the Women’s Strike. Centring anticolonialism and anti-racism within an intersectional Marxist feminism, the book puts forward an urgent demand to free ourselves from the capitalist, imperialist forces that oppress us.

Crackers and Savages
Wagering on the Us
Houria Bouteldja

In Europe and North America, we see the trend of a white working class tempted by right wing populistic political parties. From Marine Le Pen, to Trump, through Georgia Meloni, fascist candidates seem to reap the fruits of social unrest everywhere. With her usual thought-provoking and unyielding analyses, Houria Bouteldja shows in this short essay how the history of the left explains this conundrum and how to overcome it. Drawing from Black radical and decolonial marxism, she shows that by privileging white constituencies, unions and left parties laid the foundations for a racial contract that bind workers and the poor to the Nation-State.

To destroy the racial contract and defeat the far-right, it will be of no help to give ground to nationalistic nostalgia with a socialistic flavor. On the contrary, the book shows that uniting crackers and savages will require a hegemonic project of popular sovereignty, where national identity and genealogies are reworked through revolutionary love. Looking forward, the book offers a passionate plea for antiracism as a redemptive struggle of peace-making among the people, liberating oppressors and oppressed of the cultural heritage of barbarism that weighs upon them.

We Will Always Be Barbarians
Louisa Yousfi

In postcolonial Europe, assimilation still seems to be the criterion of acceptability for non-white people in their jobs, in the cultural sphere or facing the repressive state apparatuses. In this exquisite and lively essay, Louisa Yousfi unpacks what it means to resist this process of subalternization. She names this subjective and affective resistance the (post)colonized, following Algerian novelist Kateb Yacine’s insight, barbarism. In a short and breathtaking reading of major novelists (Chester Himes, Mohammed Dib, Toni Morrison, Ralph Ellison) and rappers, she delineates aesthetics and politics of the barbarian. Louisa Yousfi’s proverbial style proves that aesthetics and politics are inseparable and that a literary and linguistic revolution is part and parcel of a genuinely decolonial path of liberation.

The courage to evoke racialised women’s day-to-day fight and decolonial feminists’ struggle. A resolute and indefinite refusal to fall into the essentialism of the “indigenous man”, which so opportunely masks the violence everywhere done to women throughout our societies.”

The Colonial Counter-Revolution
Sadri Khiari

In The Colonial Counter-Revolution, Sadri Khiari outlines how and when American-style slavery created the racial system, not just in the United States but internationally, and why the development of relationships of equality within the white community favored the crystallization of specifically racial social relations. A Popular History of Psychoanalysis
Florent Gabarron-Garcia

It has been a few decades since Freud became a bad name, not only in mainstream psychiatry, but also in radical thought. Freud and Lacan were accused of sexist and class biases through their theorizations of a universal Oedipus and symbolic castration, along with strict sexual difference, as sine qua non to the development of a “normal” subjectivity.

This timely book addresses both these prejudices against psychoanalysis and the unfortunate depoliticization of many practitioners and thinkers in the field. Recalling Freud’s radical moments (his promotion of free clinics in Weimar led by his socialist leaning colleagues), or lesser known figures such as the Marxist Feminist psychoanalyst Marie Langer, and institutional experiments like the Saint Alban and La Borde clinic (where Guattari, Deleuze’s famous partner-in-crime, worked), Gabarron-Garcia shatters the all too comfortable narrative of psychoanalysts as respectable bourgeois placidly interpreting family complexes sheltered in their consulting room. Through this history where popular revolutions cross-fertilize the exploration of the unconscious as well as collective clinical practices, this book is a most relevant essay for those who wish to resist the generalized conformist, chimiotherapic-centered and repressive management of madness in late neoliberal capitalism.

Politics of Aesthetics in Modernist Literature
Jacques Rancière

What are the politics of modernist aesthetics? A commonly held view in literary criticism relates modernism to capitalism and the commodification of everyday life. In a concise series of essays, Jacques Rancière debunks the idea of Flaubert, Baudelaire, Conrad, Woolf and Keats as producers of bourgeois mythologies. Against the grain, Rancière lays bare the egalitarian impulses of modernist literature.

Through their vivid and lofty descriptions of material life, everyday concerns, streams of consciousness, modernists have broken the sacrosanct hierarchy of actions and life-forms pervading classical literature. In the midst of the 19th Century, poets, novelists and playwrights have challenged the narrative focus on noble deeds and moral ends. Instead, modernism introduced a new “structure of feeling”, depicting experiences that had been considered too shallow, intimate or plebeian to deserve aesthetic representation. In this, Rancière argues, modernist literature fostered an egalitarian “distribution of the sensible”. This book is a major introduction to this deep change in the politics of representation and a compelling development of Rancière’s commended aesthetics.

Uncertain times
Jacques Rancière

Jacques Rancière, one of the most read radical thinkers in aesthetics, philosophy and political theory, is a man of few words when it comes to intervene in current affairs. Principled and wise, the philosopher never tells people in the streets what they should or should not do. He is however a sharp critic of dominant ways of thinking equality, democracy as mere formalities. In this essay, one will find his major interventions of the last 30 years, not only lambasting increasing oligarchic governance, anti-immigrant laws, neoliberal “reform”, but also showing how new forms of protest (the indignados, the Gilets Jaunes, Nuit debout) should transform our understanding of popular autonomy from the State, and resist both populist and anti-populist temptations in the so-called “post-truth” age.

The Times of the Landscape
On the Origins of the Aesthetic Revolution
Jacques Rancière

Jacques Rancière is well-known for his exploration of aesthetic modernity. In literature, cinema or photography, the French philosopher has convincingly shown the aesthetic conditions of political emancipation. In this new book, Rancière goes along the same path to unravel the revolution that happened in the theory of painting and the theory of gardens in Europe around the year 1789. In an epoch marked by a growing interest in human ecologies, nature and landscapes, this intervention at the crossroads of politics and aesthetics is more than timely.

The Politics of Aesthetics
Jacques Rancière

"A tour de force! Through a revitalisation of the term “aesthetics”, Rancière is able to raise novel questions concerning the nature of history, the sense of our modernity, the relationship between work and art and between science and art, and the peculiarity of aesthetic experience (showing, in essence, that it cannot be contained but informs all our forms of life and activities)."

On the Shores of Politics
Jacques Rancière

It is frequently said that we are living through the end of politics, the end of social upheavals, the end of utopian folly. Consensual realism is the order of the day. But political realists, remarks Jacques Rancière, are always several steps behind reality, and the only thing which may come to an end with their dominance is democracy. ‘We could’, he suggests, ‘merely smile at the duplicity of the conclusion/suppression of politics which is simultaneously a suppression/conclusion of philosophy.’ This is precisely the task which Rancière undertakes in these subtle and perceptive essays.

The Willing Slaves of Capital

In this fascinating new essay, Lordon brings together the critique of political economy of Karl Marx with the anthropology of the passions of Benedict Spinoza. Imperium
Structures and Affects of Political Bodies
Frédéric Lordon

Abolishing the State is among the mottos of most of today’s radical movements: it is the defining horizon of the extraparliamentary left and exerts a considerable influence on a broader spectrum of progressive forces through anti-Stateist outlooks. This book, while sympathizing with this general impetus, critically examines the relevance of an anti-State agenda from the left. Lordon locates a crucial blindspot in the hope of a vanishing State. This political project relates to a political philosophy of social transparency and contractual arrangements that leaves aside the institutional dimension of collective life.

Written by one of the most prominent French heterodox economists, deeply influenced by the philosophy of Spinoza, this book elegantly discusses the pitfalls of both State-centered and anti-State politics – through a close reading of Pierre Bourdieu, Alain Badiou or Étienne Balibar. It is compelling for emancipatory politics to invent new forms of collective belonging and non-exclusive popular sovereignties.

Living Free of?
Institutions, police, labour money
Frédéric Lordon

In this short interview book, Frédéric Lordon shows how the intellectual conjuncture reflects this Zeitgeist and provides the rationale behind it – notably through a close reading of the works of Deleuze, Badiou, Rancière and, most of all, Agamben. Lordon argues that all these discourses boil down to cutting the heart of politics itself. In demanding that emancipation be at distance from any collective exercise of power, Agamben’s politics gives little space for agency, deliberation, and decision. Restoring the true meaning of collectives, Lordon shows how inescapable it is to govern the commons, although this constructive dialogue outlines a most urgent point of agreement: the vital need for a radical critique of the capitalist State and police apparatus.

Figures of Communism
Frédéric Lordon

A decade ago, a handful of the world’s most prestigious radical philosophers organized memorable events to relaunch the “Communist hypothesis”. It is now our task to make it more than a mere hypothesis, a coherent program. In this essay, French philosopher and economist Frédéric Lordon shows how urgent it is to fulfill this promise. Global warming, increasing poverty, neofascisms, State racism, constitute all in themselves a threat to humanity. But Lordon argues that we cannot expect the people to give a blank cheque to radical intellectuals and parties after the tragedy of Soviet and Eastern bloc experiences. That is why, unless communists lay down their project of society, and elaborate their strategy to go from A to B, they are likely to be ignored by workers and the oppressed. Rather than complaining about the overwhelming influence of reactionary media on poor people’s brains, Lordon proposes a clear blueprint for socialist construction and radical reform. The system he argues for is a very original combination of generalized self-management, forbidding capital accumulation while retaining market mechanisms, with a general regulation of wages and social security as an investment fund.

This book provides a very complete ABC of why we should transcend capitalism and how socialism might work. A timely intervention when younger generations get increasingly aware that neoliberalism needs to be overcome for the sake of humanity.

Two Revolutions of the XXth Century
Alain Badiou
Narrating history and philosophy with his usual pedagogy and intellectual rigor, Badiou also proposes close readings of two key texts of the revolutionary tradition of the xxth Century: Lenin’s *April Theses* and Mao’s *Declaration in 16 Points*. In this pathbreaking study, Badiou proposes to think of Lenin and Mao as precursors, as experimenters of a politics of a new type, at a distance from the State, close to “mass organizations” and the autonomous activity of the popular classes.

Reflections on antisemitism
Alain Badiou et Éric Hazan
“French anti-Semitism is a very different animal to the diffuse form that has existed in the UK and these essays … help us comprehend its complexities. Walking round Tel Aviv nowadays you are more likely to hear French spoken than English. Reading these essays it is not difficult to understand why.”

*Birmingham Jewish Recorder*

Since the inception of the “War on Terror,” Israel has become increasingly important to Western imperial strategy and ever more aggressive in its policies towards the Palestinians. A key ideological weapon in this development is the cynical and unjustified accusation of “anti-Semitism” to silence protest and dissent. For historical reasons, this tactic has been deployed most forcefully in France, and in the first of the two essays in this book French writers Alain Badiou and Eric Hazan demolish the “anti-Semitism is everywhere” claim used to bludgeon critics of the Israeli state and those who stand in solidarity with the banlieue youth.

Pocket Pantheon
Alain Badiou
In this accessible work, France’s leading radical thinker takes his readers on an incisive journey through twentieth-century philosophy. On the way he pays homage to great thinkers who have influenced him, whether as teachers, allies or opponents: from Althusser, Lacan and Sartre to Deleuze, Derrida and Foucault. Although Pocket Pantheon is at times critical, Badiou defends both his subjects and their work by setting them against the contemporary landscape of pop philosophers and media commentators.

The Adventure of French Philosophy
Alain Badiou
Edited by Bruno Bosteels
Over forty years of French philosophy through the eyes of its greatest living exponent. *The Adventure of French Philosophy* is essential reading for anyone interested in what Badiou calls the “French moment” in contemporary thought. Badiou explores the exceptionally rich and varied world of French philosophy in a number of groundbreaking essays, published here for the first time in English or in a revised translation. Included are the often-quoted review of Louis Althusser’s canonical works *For Marx* and *Reading Capital* and the scathing critique of “potato fascism” in Gilles Deleuze and Félix Guattari’s *A Thousand Plateaus*. There are also talks on Michel Foucault and Jean-Luc Nancy, and reviews of the work of Jean-François Lyotard and Barbara Cassin, notable points of interest on an expansive tour of modern French thought.
Guided by a small set of fundamental questions concerning the nature of being, the event, the subject, and truth, Badiou pushes to an extreme the polemical force of his thinking. Against the formless continuum of life, he posits the need for radical discontinuity; against the false modesty of finitude, he pleads for themathematical infinity of everyday situations; against the various returns to Kant, he argues for the persistence of the Hegelian dialectic; and against the lure of ultraleftism, his texts from the 1970s vindicate the role of Maoism as a driving force behind the communist Idea.

Democracy, in What State?
Giorgio Agamben, Alain Badiou, Daniel Bensaïd, Wendy Brown, Jean-Luc Nancy, Jacques Rancière, Kristin Ross & Slavoj Žižek

“Democracy in What State? is timely, represents a wide variety of thinkers, and displays the political themes that are concern to these thinkers. This allows the reader not only to have access to a general progressive critique of current political practice but also to compare different approaches to progressive thought and action, particularly (although not exclusively) in the contemporary French scene. From Canguilhem to Foucault,
The Power of Norms
Pierre Macherey

Where do these norms come from? From where do norms derive their power? From lived experience, explains Canguilhem. From something that could be called History, according to Foucault. How did experience and history come to merge, in practice, their respective actions? That question is the focus of these two key authors of the latter half of the twentieth century, who engaged in a constant dialogue going on between them. Five studies, composed between 1963 and 1993, give an account of the way Canguilhem and Foucault developed the thematic of norms – an innovation whose importance is universally recognized today.

The University Discourse
Pierre Macherey

Pierre Macherey offers us in this book a fascinating long-view perspective on the question by exploring and comparing the views of classical philosophers (Kant, Hegel, Heidegger), critical theorists in the social sciences (Lacan, Bourdieu, Passeron) and writers (Rabelais, Hardy, Hesse, Nabokov). With such a critical distance, Macherey’s rigorous and penetrating reflections allow us to assess the transformations and resistances currently underway in higher education with a wiser, more objective eye that does not seek to gild the university with nostalgia or self-satisfaction.

A Radical Introduction to the French Enlightenment

Bertrand Binoche

The radicality of French Enlightenment cannot be overstated, as its political quiescence never amounted to a resigned wisdom (in the way of Kant), but went along a deeply polemical and satirical denunciation of the existing state of things. Summing up major contributions of multiple authors through original and illuminating theses, Bertrand Binoche succeeds in making the Philosophes forerunners of modern social critique and a challenging and fascinating (albeit underestimated) school of thought.

Chronologies of the Present

Sylvain Lazarus

Is it possible to think emancipatory politics without the concepts of class, party, revolution? Without lapping into liberal varieties of anti-marxism, Sylvain Lazarus is committed to a renewal of our understanding of emancipation after the end of communist revolutionary processes. Among radicals, the author contends, the question is often put in the wrong way: instead of asking why they fail to win majorities among the people, they should inquire into the masses’ (les gens) own original forms of thinking. According to Lazarus, a politics without parties or classes will find its proper distance from the State as soon as it experiments collective thinking about what governments do to their people. This book is a practical handbook to build networks of inquiries (enquêtes) and experiments among the people, for the people, where thinking is less a matter of vindicating dignity in the face of public corruption, policing and bureaucratism.

The Novel of the Political

Natacha Michel

Post-68 maoism in France has become a legend for its most prominent figures and thinkers. Among the biggest names of contemporary critical theory, living or dead, have historically participated in this political legacy: from Badiou to Rancière through Althusser. Less emphasis was put on the grassroots and organizational underpinnings of this extraordinary theoretical production. In this beautiful essay, French novelist, philosopher and literary critic Natacha Michel retells the events surrounding the foundation of Alain Badiou’s own political organization, Union des communistes marxistes-léninistes de France (ucfml) and then l’Organisation politique (op). Natacha Michel shows how original the trajectory was for a maoist politics that never covered up Stalin’s atrocities and soon became critical of the Cultural revolution’s failings. It is a powerfully written lesson of political fidelity to the Event of 1968, and a missing link in the continuing discussion of Badiou’s contribution to critical philosophy.

Paris in Turmoil

No other French writer has generated more social commentary than realist novelist Honoré de Balzac. From Roland Barthes to György Lukács, Balzac has always fascinated critical thinkers for his uncompromising and sharp portrayal of the old upper classes’ demise and the ascendency of an affairiste bourgeoisie. In this new study, Eric Hazan revisits this venerable tradition through a circumsstantial reconstruction of Balzac’s Paris. In keeping with his widely acclaimed The Invention of Paris, Hazan dwells on numerous spatial details of Balzac’s life and colossal masterpiece La Comédie humaine, to convey the political and symbolic geographies the novelist brought to life. Far from an overladen piece of scholarship, Hazan’s shows with his usual elegance and soberness considerable insight on Balzac’s complex narratives and Paris’ intricate and social history.

Has Paris, the “capital of the 19th century” (Walter Benjamin) become a mere museum-city, a city of power from which the people are excluded? From the blatant destruction of entire neighborhoods in the past to a subtler yet pervasive form that commodifies sections of the city for capitalist display, a battle unfolds. Amid this, there exists another Paris, unbothered by conventional heritage, thriving as a space for daily experimentation. Paris, regardless encapsulates this struggle:

First Revolutionary Measures

When political leaderships in the West collapse, it will be essential for the people that they put communism immediately on the agenda. This book is a short introduction about what is to be done in the aftermath a regime’s demise: how to prevent any power from restoring itself and how to reorganize society without a central authority and according to people’s needs. Small-scale production, massive reduction of work, delocalized and grassroots restructuring of healthcare, transports and industry, abolition of wage work: such are the steps that First revolutionary measures unfolds in a practical manner.

Dynamics of rebellion
On past insurrections and others to come
Publication: March 2015/140 pages
Eric Hazan provides a radically unconventional narrative. Contrary to all talks of a vanguard party, insurrections break out when unexpected, he shows. Even more: in each revolution, so-called “revolutionary parties” have always been off the mark, trying to bring the movement back in the bosom of parliaments, assemblies or “popular fronts”. Hazan’s alternative is sketched in a vivid and sensible assessment of a variety of revolutions: through the examples of the Paris Commune of 1871, the Shanghai Commune of 1967, the Russian revolution of 1917, the Spanish revolution of 1916-1937, the German revolution of 1919, and the zapatistas, the author shows that successful insurrections entail fed up people who start a movement, military conspiracies (revolutionary committees of a handful of individuals) and defections among repressive forces.

The French Revolution and the Colonies
Marc Belissa

The French Revolution stands out as a pivotal moment in the history of colonization and slavery. The slave revolt in Saint-Domingue, which led to the first abolition of slavery and the establishment of the first black republic in Haiti, has remained famous for its global impact and was immortalized in The Black Jacobins, a classic work in radical black and africana studies. However, there was a need to expand the scope. In this engaging and meticulously crafted work, Marc Belissa delivers the first comprehensive synthesis on the role of colonies and slavery during the French Revolution. Going beyond a narrative confined to French borders, Belissa shows that the fate of the vast and prosperous colonial and slave empire of the King of France, the heroic struggle for its dismantlement in Saint-Domingue, as well as in Guadeloupe, Réunion, Tobago, or Martinique, involved major slaveholding powers such as England or Spain and set the tone for anti-slavery revolts in the Americas for the century to come. The author recounts the few months that shook the world, as well as the political and intellectual history of abolitionist movements, and the powerful reaction of the colonial party, not only in France but also among rival European powers and, ultimately, at the initiative of Napoleon Bonaparte. While the counter-revolution succeeded in reinstating slavery and its dominance in most of the colonies, Belissa emphasizes that the colonial and slave order was forever fatally weakened. This book is essential in the era of global histories, where perspectives from below and narratives from the perspective of indigenous people, the colonized, and victims of slavery are flourishing.

Marc Belissa is a lecturer in modern history at the University of Paris-Nanterre.

In this succinct essay, Sophie Wahnich explains how, contrary to prevailing interpretations, the institution of Terror sought to put a brake on legitimate popular violence—in Danton’s words, to “be terrible so as to spare the people the need to be so”—and was subsequently subsumed in a logic of war. The Terror was “a process welded to a regime of popular sovereignty, the only alternatives being to defeat tyranny or die for liberty.”

The Revolution Betrayed
Napoleon Bonaparte and the Society of Property Owners
Marc Belissa, Yannick Bosc

The bicentenary of Napoleon Bonaparte’s death has given rise in France to a series of tributes from the political class and the media praising the merits of this ‘builder’ and ‘strategist’ who restored order after the Revolution. In a period of authoritarian hardening of the current regime, the Napoleonic myth once again serves the fantasy of order and a strong state. Against such glorification, this book shows the conditions under which Bonapartism was imposed and its heavy legacy on French institutions: the confiscation of democracy, the reign of experts, police surveillance, patriarchy, the omnipotence of landlords and more. It also reminds us why, outside the borders of France, the name of Bonaparte remains associated with a disastrous military adventurism that sought to impose his yoke on the peoples of Europe, by a bloody colonial reaction and the re-establishment of slavery.

1941-1946
Joëlle Fontaine

The story of the heroic resistance to Nazi occupation led by the Communist inspired EAM(National Liberation Front) and its army, the ELAS, is too often forgotten. In the zones controlled by these forces, popular committees ruled and the partisans found themselves fighting against the occupying forces and the pro-monarchist property-owning classes which were determined to see their previous privileges restored. Plus, the British were on the scenes, acting as arbiters but actually plotting for a restoration of the monarchy. Once the Nazis had been defeated, the façade of unity disintegrated and the nation was split in two. A vicious civil war followed.

Jewish Berbers
Julien Cohen-Lacassagne

It is often thought that Jewish people have, since the destruction of the Temple, been an exiled people, and most Jewish descent stemmed from this early diaspora. On the contrary, as award-winning Shlomo Sand (who authors a foreword for this book) has consistently shown, Jewish people did not hesitate to convert other people. In this pathbreaking book, Cohen-Lacassagne debunkes one of the most entrenched myths about Jews in the mediterranean: the idea of Sephardic-Jewishness. Reframing Jewish identities represents a timely intervention in a world where it seems more urgent than ever to recall Jewish affinities with Arabic-Berber communities in the long history of the mediterranean. “Judeo-christianity” is, in fact, far less a thing than Judeo-islamity.

Eyal Sivan & Armelle Laborie

This book is a defense of a strategy of cultural boycott, in regards with new tactics of “branding Israel”. Contrary to pro-Israel legal advice, the authors demonstrate that a cultural boycott of Israel does not constitute a discriminatory policy. Individuals, whatever nationality, are not targeted. What is needed is a boycott of the cultural and academic institutions that either whitewash illegal occupation, or directly collaborate in a particularly brutal and militarized state violence. Lucidly, vividly and with unfailing rigor, the authors (one of them an anti-occupation Israeli filmmaker) reclaim the legacy of successful non-violent tactics of “branding Israel”. **Introduction to Eric Hazan**

“Amid the intellectual murkiness of the European scene, a few bright flames are burning: as witness the work of Eric Hazan. Founder-director of Éditions La Fabrique, since 1998 he has published a steady stream of radical and imaginative works, notably translations of dissident Israeli and Palestinian writings. Over the last six years he has produced four books of his own, among them *L’Invention de Paris* (2002), *Chronique de la guerre civile* (2004) and *Changement de Propriétaire: La guerre civile continue* (2007) – extracts from which are reproduced below. Hazan was born in Paris in 1936, and trained as a medical student. Briefly a young Communist militant, he broke with the Party in 1956 – not over Hungary, but Algeria: a pcf that disavowed its Arab comrades, and expelled militants arrested for supporting the FLN, was no longer the Party of the Resistance. Hazan joined a trickle of doctors in counter-flow to the mass exodus of French professionals from Algeria in 1962, working as village medic. In 1970, he helped form the Franco-Palestinian Medical Association and served as a volunteer doctor in a refugee camp outside Beirut. The shift to publishing came in 1983, when he took over his father’s art house, Éditions Hazan; forced into a deal with Hachette 15 years later, he broke free to set up La Fabrique. A rare actor, but also the deep contradictions behind the model: regional imbalances due to support to non-State militias, sectarianism, corruption and bureaucratism, rivalries with other fundamentalist tendencies (notably, salafism, Muslim Brotherhood), Turkey and Yemen. Although Wahhabism appears like a trillion-fueled monolith, cracks may have begun to show.
