“One of the most significant and inspiring contributions to contemporary political philosophy”

New Left Review

Disagreement Politics & Philosophy

New foreword by the author
Jacques Rancière

After the collapse of the Soviet system, the prevailing sentiment hailed the return of political thought and the triumph of a peaceful, consensual democracy. Jacques Rancière sought to reveal that this supposed «return» of politics in fact marked its dissolution.

Politics, in its truest sense, is the power of the people—that is, of those who possess no special title or privilege to govern. It is this paradoxical power of the part-without-part that, from ancient Greece to modern emancipation movements, has disrupted the so-called natural order of things—an order in which authority is reserved for those deemed destined to it by birth, wealth, or knowledge. Consensus signifies the erasure of this part-without-part, reducing politics to the mere management of objective necessity, itself identified with the laws of economic domination.

This philosophical classic lays bare how this purportedly peaceful governance gives rise to new forms of exclusion, hatred, and violence. At a moment when the world’s rulers unabashedly confess their desire for total domination over bodies and minds, Rancière’s argument resonates with undiminished urgency.

“A brilliant essay on the politics of Literature.”

Far Away Freedom An Essay on Chekhov Jacques Rancière

Chekhov’s short stories offer a subtle yet powerful message: the potential for change in our lives. Contrary to the image of a desolate soul, Chekhov emerges as a beacon of hope and freedom. His narratives delve into the very essence of time, juxtaposing the relentless monotony of servitude with the glimmering moments that fracture this cycle, hinting at the existence of a different, more liberated existence.

This is the way to approach all these brief tales of lost lives, nights filled with tears and joy, landscapes, or love. Chekhov advocates for these women who turn an extramarital affair into a revolution of existence. Against the cynicism of those who believe time is destined to replicate the same. In these glimmers, new forms of life arise—noble and sensible shapes that we might already be nearing and occasionally perceive. Rancière, using Chekhov’s stories as a lens, sees literature not as a source of knowledge but as a catalyst for reshaping emotions. It’s about reframing our experience of sadness, urging us towards a different life. He unveils the profound capability of literature: positioning us within the landscape of freedom, transparent about the distance it holds from our reality, yet unwavering in the standards it sets, inviting us to strive towards them.

“A brilliant Fanonian overview of the Kurdish struggle.”

houria bouteldja

Kurdish Lessons Wretched of the Mountains Azadî

For over a century, the Kurds have faced the brutal assimilationist policies of Turkey, Iraq, Iran, and Syria, as well as the intrigues of imperialist powers in the Middle East. It is due to their unique situation as an “international colony”—at the intersection of four states with divergent agendas and entangled in unfavorable alliances—that they missed the wave of decolonization in the 1960s.

The shift toward Marxist ideologies and then armed struggle in the 1970s and 1980s led to the emergence of a transnational Kurdish movement, which paid dearly for its successes under deadly repression. This long journey ultimately challenged the model of the “nation-state-with-borders” in favor of advocating for the “autonomy” of the world’s largest stateless people.

This is the path of “democratic confederalism” laid out by the PKK (Kurdistan Workers’ Party) and put into practice in Rojava—a true revolutionary laboratory—for over a decade. Although sometimes subject to questionable or even reactionary instrumentalization, this Fanonian reading highlights how the Kurdish struggle to preserve their language, culture, and rights offers a powerful example of revolutionary resilience and a vision of decolonial peace.

“How does a system based on the exploitation, dispossession, and oppression of the vast majority of humanity manage to endure?”

The Global War on Peoples Imperial Mechanism of the Security Order Mathieu Rigouste

Counter-insurgency doctrines, weapons of war, police techniques, surveillance systems, technologies of power... Traversing centuries and continents, Mathieu Rigouste describes the functioning of an imperial mechanism based on the war against peoples, adapting and resonating between colonial and metropolitan battlefields. He traces its role in the formation of police and prisons, borders and ‘global apartheid,’ military-industrial complexes, and a market of violence that structures the international order. For the war against peoples does not constitute ‘either an exception, a dysfunction, or a tragic characteristic of the human species.’ It instead structures the order of the contemporary world. Exploring the U.S. wars on crime, drugs and terror as well as Latin American anti-communist interventions, from post-Oslo strategies in Palestine to the invasion of Iraq and Afghanistan or strategies to counter the Arab spring, Rigouste offers a striking mapping of the contemporary counter-revolution and the process of security-driven neo-fascisation.

Designed as a ‘critical tool for collective emancipation’ while addressing the broadest audience, the work offers new ideas to shake up debates on imperialism and colonialities, power, and revolution.

City in Shards

Notes on Disappearing Towns.

Jean-Christophe Bailly

“The appearance of a town changes much more quickly, alas! than the heart of a mortal man.” Jean-Christophe Bailly reflects on the transformation of the urban experience in the contemporary world guided by Baudelaire’s influence. He examines how the city’s form is in constant tension with the desires of a power that seeks only conformist, lifeless spaces—ones dedicated solely to commerce and regulated by the obsession with the monumental, heritage preservation, or grand architectural projects. Drawing on references to Hugo and Les Misérables, Joyce, Pessoa, meditations on the idea of utopia, this book intertwines memories and stories with a critical examination of the city’s evolution, from Paris to Seoul, from Lisboa to London. It explores what has become of the city since it ceased being the monadic space where, until recently, flâneurs could still feel at home. In opposition to the endless expansion of the metropolis and the dominance of the universal suburb, Bailly focuses on autonomous spaces, fallow lands, and wastelands—the «zones»—which offer a kind of breathing space. He shifts the perspective: the “shards” and “fragments” are no longer seen as remnants of an uncontrollable explosion but as expressions of a persistent dream. A dream of the flâneur, who presents this text as a remedy, both to nostalgic retreat and to the “trendy” ideologies of certain architectural trends.

Astrocapitalism: A History of the Conquest of Space

From Nazi Rockets to Elon Musk

Irénée Régnauld & Arnaud Saint-Martin

In a few decades, space conquest seems to have become an unavoidable goal for multibillionaires and the governments of developed countries. Terraforming, manned exploration of Mars, lunar exploitation—in the face of environmental crises, outer space is presented as a panacea. The authors of this thorough work provide, for the first time and decisively, the genealogy of this desire for conquest. Rooted in a colonial and civilizing imaginary, this ambition is initially explored and implemented by Nazi engineers who were repurposed in aerospace in the United States after the war. From the arms race to astrocapitalism, Irénée Régnauld and Arnaud Saint-Martin shed light on the grim appropriation of billions of euros in research and development and of our celestial vault for polluting, speculative, and often illusory purposes. Driven by an imaginary of territorial domination and fantasies derived from science fiction, our world leaders are indifferent to the sustainability of the mass of space objects or the actual feasibility of their wildest projects. Against the false certainties of techno-utopia and its dead ends, the authors invite civil society to reclaim these topics and outline the possibility of a more artisanal, playful, and sustainable approach to space exploration.

Irénée Régnauld is research associate at Compiègne University of Technology.

Arnaud Saint-Martin is a sociologist and researcher at the CNRS.

Rednecks and Barbarians

Uniting the White and Racialized Working Class

Houria Bouteldja

In Europe and North America, we see the trend of a white working class tempted by right wing populist political parties. From Marine Le Pen, to Trump, through Georgia Meloni, fascistic candidates seem to reap the fruits of social unrest everywhere. With her usual thought-provoking and unyielding analyses, Houria Bouteldja shows in this short essay how the history of the left explains this conundrum and how to overcome it. Drawing from Black radical and decolonial marxism, she shows that by privileging white constituencies, unions and left parties laid the foundations for a racial contract that bind workers and the poor to the Nation-State.

To destroy the racial contract and defeat the far-right, it will be of no help to give ground to nationalistic nostalgia with a socialistic flavor. On the contrary, the book shows that uniting crackers and savages will require a hegemonic project of popular sovereignty, where national identity and genealogies are reworked through revolutionary love. Looking forward, the book offers a passionate plea for antiracism as a redemptive struggle of peace-making among the people, liberating oppressors and oppressed of the cultural heritage of barbarism that weighs upon them.

Against Antisemitism and its weaponization

Judith Butler, Ariella Aïsha Azoulay, Sebastian Budgen, Leandros Fischer, Maxime Benatouil, Houria Bouteldja, Françoise Vergès, Frédéric Lordon, Naomi Klein

A wave of outrage is shaking the world in response to the massacre committed by the Israeli army in Gaza over the past year. From American campuses to the streets of Tangiers, from the University of São Paulo to actions taken in London, Paris, or Rome, a significant part of the world refuses to passively witness genocide. Yet, this wave of solidarity must contend with an insidious reactionary campaign that equates any form of solidarity with the Palestinian people, and any criticism of Israeli colonialism, with anti-Semitism. Without bothering to substantiate the accusation, activists are questioned by anti-terrorism units, professors and students are suspended, and statements by left-wing leaders are distorted to discredit the broad legitimate movement supporting Palestine. Against this unjust process, this book brings together voices that analyze the methods and warn of its consequences for the fight against all forms of racism. For the weaponization of anti-Semitism could very well be the grave-digger of the real fight against anti-Semitism.

Judith Butler denounces the threat that this instrumentalization represents for academic and intellectual freedoms.

Françoise Vergès shows how the offensive unfolds in the world of arts and culture and calls for engaging in this battlefield. **Maxime Benatouil** unravels the recent linkage between anti-Zionism and anti-Semitism. **Ariella Azoulay** urges to «work towards the decolonization —and de-nationalization—of Jewish populations worldwide.» **Leandros Fischer** discusses the ambivalent relationship with Israel and anti-Semitism in the political class of his country, Germany. **Sebastian Budgen** revisits the “Corbyn affair” in England. **Houria Bouteldja** argues that the fight against anti-Semitism today must also combat its instrumentalization, along with its «double,» Islamophobia. Finally, **Frédéric Lordon** sees in the West’s stance toward the genocidal war waged in Gaza an irreparable defeat of thought. **Naomi Klein** calls for an exodus from Zionism.

In Defence of Barbarism

Non-Whites Against the Empire

Louisa Yousfi

Is social integration all it's cracked up to be? Not in the defiant view of first-time French author Louis Yousfi who herself has North African roots. Taking its inspiration from the leading Algerian writer Kateb Yacine ('I'm better off not being too cultivated. I have to retain a certain barbarianism'), this provocative essay explores ways of resisting the cultural and moral hegemony of the 'Empire'.

Challenging the conventional wisdom that posits integration as an unalloyed good, she shows how assimilation can equate to the loss of traditions, religion, language, and culture. And, whether discussing 9/11, the Algerian colonial era, the media treatment of celebrities of Arab origin, or the second-class status of French citizens from an immigrant background, she holds an uncompromising mirror up to the West and its moral shortcomings, as if to say: a barbarian I may be, but who is the real monster? Yousfi - a young charismatic and dynamic author who uses a refreshingly wide range of cultural reference points, including rap music, to construct her argument - opens up the path of a decolonial cultural politics and an aesthetics of resistance.

Whites, Jews and Us

Houria Bouteldja

Foreword by Cornell West

"The hatred that Houria Bouteldja arouses is commensurate with her courage. The courage to shake up our worthy consciences when we prefer to forget what we gain from being whites, here in the West. The courage to evoke racialised women's day-to-day fight and decolonial feminists' struggle.

A resolute and indefinite refusal to fall into the essentialism of the "indigenous man", which so opportunely masks the violence everywhere done to women throughout our societies. "

How to Fight Sexual Violence without Turning Violent?

A Postcarceral Feminist View of Justice

Elsa Deck Marsault

In recent years, an increasing number of feminist activists have engaged in anti-prison reflection. Yet, how to reconcile the #Blacklivesmatter and #Defundthepolice movements with the demand, emphasized since #Metoo, to punish sexual offenses more severely? the author argues that an emancipatory feminism must reconsider its attachment to punishment and its concept of justice based on the exclusion of perpetrators. She vividly and precisely recounts her experiences in mediating within political groups marked by internal crises, accusations of rape or assault, and describes the pitfalls of responses such as straightforward “call out”, ostracism, or harassment against offenders. Rather than focusing on punishment and seeking retribution, she emphasizes the centrality of support and assistance for victims, the strengthening of community solidarity, and the possibility of dialogue leading to mutual recognition of facts and grievances. This radical plea for genuine transformative justice is a crucial contribution to rebuilding a viable feminist perspective for prison and penal abolitionism.

Kollontai

Undoing the Family and Making Love Again

Olga Bronnikova & Matthieu Renault

Revolutions are known to arouse social and political imaginaries. Alexandra Kollontai, a key figure in the Russian Revolution and the early Soviet government, left a highly emblematic body of work in this regard. Celebrated as a precursor to the sexual revolution, she is, however, often reduced to an expression of feminism deemed too outdated to be relevant today. In this significant book, Olga Bronnikova and Matthieu Renault capture the richness of Kollontai’s thought. Examined in its context, with unpublished primary sources, the Marxist feminist shows a deep engagement in utopian reflection, influenced by Russian literature and confronted by the uneven development of the tsarist empire’s rural areas. Among revolutionaries, she stands out as one who seeks to understand the psyche and its transformations, striving to reinvent an emancipatory morality in a country ravaged by war and famine. Without falling into hagiography, acknowledging Kollontai’s ambiguities and limitations, the authors unfold the complexity of a thought that aims to revolutionize life, not just economic relations. An essential work at a time when radical politics are trying to achieve doable strategies and concrete utopias against systemic oppression.

“Even when one thinks they know everything about the French Revolution and the colonies, or know enough, reading this work remains essential. Extremely clear and well-researched. The author shows the hesitations, the unforeseen events, and the deadlocks that slow down the abolition of the slave trade and slavery, the achievement of equality, and civil rights. He also shows the power of the colonial lobby and the complicity of some revolutionaries. The fear of the liberation of slaves is profound, very profound.”

The French Revolution and the Colonies

Marc Belissa

The French Revolution stands out as a pivotal moment in the history of colonization and slavery. The slave revolt in Saint-Domingue, which led to the first abolition of slavery and the establishment of the first black republic in Haiti, has remained famous for its global impact and was immortalized in *The Black Jacobins*, a classic work in radical black and africana studies. However, there was a need to expand the scope. In this engaging and meticulously crafted work, Marc Belissa delivers the first comprehensive synthesis on the role of colonies and slavery during the French Revolution. Going beyond a narrative confined to French borders, Belissa shows that the fate of the vast and prosperous colonial and slave empire of the King of France, the heroic struggle for its dismantlement in Saint-Domingue, as well as in Guadeloupe, Reunion, Tobago, or Martinique, involved major slaveholding powers such as England or Spain and set the tone for anti-slavery revolts in the Americas for the century to come. The author recounts the few months that shook the world, as well as the political and intellectual history of abolitionist movements, and the powerful reaction of the colonial party, not only in France but also among rival European powers and, ultimately, at the initiative of Napoleon Bonaparte. While the counter-revolution succeeded in reinstating slavery and its dominance in most of the colonies, Belissa emphasizes that the colonial and slave order was forever fatally weakened. This book is essential in the era of global histories, where perspectives from below and narratives from the perspective of indigenous people, the colonized, and victims of slavery are flourishing.

Marc Belissa is a lecturer in modern history at the University of Paris-Nanterre.

Lenin and the Weapon of Language

Jean-Jacques Lecercle

The life and politics of Vladimir Lenin have recently gained more and more prominence in the humanities and philosophy with the return of activism and radicalism throughout the last decade. Yet, as he is remembered primarily as a political strategist and thinker, a crucial part of his legacy is overlooked. Jean-Jacques Lecercle, a philosopher and linguist, proposes in this short and sharp essay to fill this gap: Lenin is also a decisive thinker of language and literary expression. With eloquence and unusual clarity, conveying how important it is to build a radical theory of language in an age of omnipresent information and when all politics has to deal with identities, Lecercle proposes a timely new framework to read Lenin as a political stylist: forging slogans, writing polemical essays and critically assessing artistic and literary creation of his age, from Russian realist novels to futuristic painting. For Lecercle, the intersections of language and politics boil down to political struggle being a form of play, where truth needs to resonate with the social imaginary and the most acute feelings of the times.

Feminism for the World

Feminist Legacies

Zahra Ali, Silvia Federici, Veronica Gago, Lola Olufemi, Djamila Ribeiro, Rama Salla Dieng, Sayak Valencia, Françoise Vergès

Since the #MeToo movement, feminism has become a staple in various contexts. Many people, even in academic circles, are emphasizing the risk of mainstream co-optation due to this situation. However, the danger lies in the fact that today, behind this seemingly righteous radicalism, the signifier ‘feminism’ may lose its political effectiveness in abstract jargon and international solidarity ambitions that remain purely hand-waving. This book brings together prominent figures in contemporary feminism. The objective is to step aside and ground the subversive and internationalist aspects of modern feminism in tangible reality. They explore political, editorial, spiritual, and activist experiences from the past, seeking to revive their potent significance. Covering topics such as transfeminisms, women’s struggles in Senegal, Islamic feminisms, and Afro-Brazilian religions, the book aims to address pressing issues crucial for emancipatory movements, including combatting systemic violence, engaging in anti-imperialist and antifascist struggles, and politicizing care relationships.

A People’s History of Psychoanalysis

Florent Gabarron-Garcia

It has been decades since Freud fell out of favor, not only in mainstream psychiatry but also in radical thought, where both he and Lacan were accused of sexist and class biases. *A People’s History of Psychoanalysis* refuses to accept this growing depoliticization of a formerly revolutionary field.

Florent Gabarron-Garcia shatters the comfortable narrative of psychoanalysts as armchair theorists placidly interpreting family complexes sheltered in their consulting rooms. Recalling Freud’s radical moments (such as his promotion of free clinics in Weimar Germany) or lesser-known figures including the Marxist Feminist psychoanalyst Marie Langer, his new history delves into how revolutionary ferment has cross-fertilized the exploration of the unconscious.

A People’s History of Psychoanalysis is for those who wish to resist the conformist, therapist-centered, and repressive management of madness under contemporary capitalism.

Cement Capitalism

An Environmental History of Large-Scale Infrastructure

Nelo Magalhães

Environmental activism is known to challenge extractive infrastructures, but increasingly, it extends to projects involving transportation and urban landscapes, such as roads, airports, and high-speed train lines. The emphasis is often placed on the impact of these initiatives on the biosphere, their costs, and their effects on communities. However, there are few attempts to question the territorial development rooted in concrete, earth-moving, and the artificial manipulation of soils. In a groundbreaking investigation, Nelo Magalhães contends that the widespread use of concrete is a severe symptom of late capitalism. Unlike centuries ago, when urban planning considered soil characteristics, hazards related to humidity, minerals, and geological factors, post-war capitalism has continually refined methods to control soils and shape urban and agricultural spaces. This has resulted in a substantial capital investment in infrastructure and an unparalleled accumulation of waste and debris. Highway facilities, bridges, and concrete surfaces constitute an environmentally unsustainable legacy demanding ongoing maintenance and renovation, adversely affecting the biosphere and soil health. Through compelling examples, the author illustrates that a genuine ecological revolution must confront the formidable influence of concrete: disassemble the «negative commons» embodied by these concrete structures, and devise social frameworks that empower collective control over our spaces.

Bringing Ecology Down to Earth

Crafting a Plan for Ecological Action

Les Soulèvements de la terre

In our time of despair, ‘Les Soulèvements de la Terre’ (Uprisings of the Earth) emerges as a beacon. Confronting widespread helplessness, this movement based its actions on concrete living places and the specific needs of the people and life-forms inhabiting them. Fighting land and water grabs, agro-industry, and soil artificialisation—their tactics—occupation, blockades, and disarmament—have propelled them as Europe’s most influential environmental force.

Forging unique alliances among young environmentalists, traditional activists, and farmers, the Soulèvements movement unnerved the government, facing attempts at bans and deployment of anti-terrorist forces. By focusing on daily life, battling destructive local projects, and uniting these fights nationwide, they craft a practical ecological approach that gives us the ability to take back our land and shape the path ahead.

Through its account of actions, the development of hypotheses and the exploration of a series of paradoxes, this book addresses crucial strategic issues for the present. It stands as the manifesto for those who practically organise themselves to disarm and dismantle the infrastructure of the devastation.

The Commune Form

The Transformation of Everyday Life

Kristin Ross

When the state recedes, the commune-form flourishes. This was as true in Paris in 1871 as it is now whenever ordinary people begin to manage their daily lives collectively. Contemporary struggles over land - from the zad at Notre-Dame-des-Landes to Cop City in Atlanta & the pipeline battles in Canada to Soulèvements de la terre - have reinvented practices of appropriating lived space and time. This transforms dramatically our perception of the recent past. Rural struggles of the 1960s and 70s, like the “Nantes Commune”, the Larzac, and Sanrizuka in Japan, appear now as the defining battles of our era. In the defense of threatened territories against all manners of privatization, hoarding, and infrastructures of disaster, new ways of producing and inhabiting are devised that side-step the state and that give rise to unprecedented kinds of solidarity built on pleasurable, fruitful collaborations. These are the crucial elements in the present-day reworking of an archaic form: the commune-form that Marx once called «the political form of social emancipation,» and that Kropotkin deemed «the necessary setting for revolution and the means of bringing it about.

A Program of Absolute Disorder Decolonizing the Museum

Françoise Vergès

Foreword by Paul Gilroy

The Western museum is a battleground - a terrain of ideological, political and economic contestation. Almost everyone today wants to rethink the museum, but how many have the audacity to question the idea of the universal museum itself?

In *A Programme of Absolute Disorder*, Françoise Vergès puts the museum in its place. Exploring the Louvre's history, she uncovers the context in which the universal museum emerged: as a product of colonialism, and of Europe's self-appointed claim to be the guardian of global heritage.

Vergès outlines a radical horizon: to truly decolonize the museum is to implement a 'programme of absolute disorder', inventing other ways of apprehending the human and non-human world that nourish collective creativity and bring justice and dignity to the dispossessed.

Decolonial Feminism Françoise Vergès

“A vibrant and compelling framework for feminism in our times” Judith Butler

In this powerful manifesto, Françoise Vergès argues that feminists should no longer be accomplices: it is time to fight the system that created the boss built the prisons and polices women's bodies. *A Decolonial Feminism* grapples with the central issues in feminist debates today: from Eurocentrism and whiteness, to power, inclusion and exclusion. Delving into feminist and anti-racist histories, Vergès also assesses contemporary activism, movements and struggles, including #MeToo and the Women's Strike. Centring anticolonialism and anti-racism within an intersectional Marxist feminism, the book puts forward an urgent demand to free ourselves from the capitalist, imperialist forces that oppress us.

A Feminist Theory of Violence Françoise Vergès

“In this robust, decolonial challenge to carceral feminism, Françoise Vergès elucidates why a structural approach to violence is needed. If we wish to understand how racial capitalism is linked to the proliferation of intimate and state violence directed at women and gender-nonconforming people, we need to look no further than Vergès' timely analysis.” Angela Y. Davis

The mainstream conversation surrounding gender equality is a repertoire of violence: harassment, rape, abuse, femicide. These words suggest a cruel reality. But they also hide another reality: that of gendered violence committed with the complicity of the State.

In this book, Françoise Vergès denounces the carceral turn in the fight against sexism. By focusing on 'violent men', we fail to question the sources of their violence. There is no doubt as to the underlying causes: racial capitalism, ultra-conservative populism, the crushing of the Global South by wars and imperialist looting, the exile of millions and the proliferation of prisons – these all put masculinity in the service of a policy of death.

Against the spirit of the times, Françoise Vergès refuses the punitive obsession of the State in favour of restorative justice.

Uncertain times Jacques Rancière

Jacques Rancière, one of the most read radical thinkers in aesthetics, philosophy and political theory, is a man of few words when it comes to intervene in current affairs. Principled and wise, the philosopher never tells people in the streets what they should or should not do. He is however a sharp critic of dominant ways of thinking equality, democracy as mere formalities. In this essay, one will find his major interventions of the last 30 years, not only lambasting increasing oligarchic governance, anti-immigrant laws, neoliberal “reform”, but also showing how new forms of protest (the *indignados*, the Gilets Jaunes, Nuit debout) should transform our understanding of popular autonomy from the State, and resist both populist and anti-populist temptations in the so-called “post-truth” age.

Politics of Aesthetics in Modernist Literature Jacques Rancière

What are the politics of modernist aesthetics? A commonly held view in literary criticism relates modernism to capitalism and the commodification of everyday life. In a concise series of essays, Jacques Rancière debunks the idea of Flaubert, Baudelaire, Conrad, Woolf and Keats as producers of bourgeois mythologies. Against the grain, Rancière lays bare the egalitarian impulses of modernist literature.

Through their vivid and lofty descriptions of material life, everyday concerns, streams of consciousness, modernists have broken the sacrosanct hierarchy of actions and life-forms pervading classical literature. In the midst of the 19th Century, poets, novelists and playwrights have challenged the narrative focus on noble deeds and moral ends. Instead, modernism introduced a new “structure of feeling”, depicting experiences that had been considered too shallow, intimate or plebeian to deserve aesthetic representation. In this, Rancière argues, modernist literature fostered an egalitarian “distribution of the sensible”. This book is a major introduction to this deep change in the politics of representation and a compelling development of Rancière’s commended aesthetics.

The Times of the Landscape On the Origins of the Aesthetic Revolution Jacques Rancière

Jacques Rancière is well-known for his exploration of aesthetic modernity. In literature, cinema or photography, the French philosopher has convincingly shown the aesthetic conditions of political emancipation. In this new book, Rancière goes along the same path to unravel the revolution that happened in the theory of painting and the theory of gardens in Europe around the year 1789. In an epoch marked by a growing interest in human ecologies, nature and landscapes, this intervention at the crossroads of politics and aesthetics is more than timely.

The Politics of Aesthetics Jacques Rancière

“A tour de force! Through a revitalisation of the term “aesthetics”, Rancière is able to raise novel questions concerning the nature of history, the sense of our modernity, the relationship between work and art and between science and art, and the peculiarity of aesthetic experience (showing, in essence, that it cannot be contained but informs all our forms of life and activities)”,

On the Shores of Politics Jacques Rancière

It is frequently said that we are living through the end of politics, the end of social upheavals, the end of utopian folly. Consensual realism is the order of the day. But political realists, remarks Jacques Rancière, are always several steps behind reality, and the only thing which may come to an end with their dominance is democracy. ‘We could’, he suggests, ‘merely smile at the duplicity of the conclusion/suppression of politics which is simultaneously a suppression/ conclusion of philosophy.’ This is precisely the task which Rancière undertakes in these subtle and perceptive essays.

What if “human capital”, “efficiency theorem”, “principal-agent”, “Coase theorem” were not just flawed theories but blueprints for a new model of society, based on the absolute primacy of the market? In this light, the State paradoxically appears as a decisive actor for imposing market constraints and the primacy of the profit-motive over all social activities. In this respect, this book provides a major insight into the authoritarian underside of neoliberalism.

The Willing Slaves of Capital Spinoza and Marx on Desire Frédéric Lordon

“This ambitious but always clear book aims to reopen the conceptual framework of capitalism.” *LE MONDE*

“This work is an initiatory voyage towards communism.” *L'HUMANITÉ*

In this fascinating new essay, Lordon brings together the critique of political economy of Karl Marx with the anthropology of the passions of Benedict Spinoza. For Lordon, it is crucial in order to understand the nature of the wage-labour relationship to factor the affects, desires and passions of the workers, the manner in which they invest themselves emotionally in their labour and their own servitude and domination.

Imperium Structures and Affects of Political Bodies Frédéric Lordon

What should we do with the ideals of internationalism, the withering away of state and horizontality? Probably start by thinking seriously about them. That is to say, about their conditions of possibility (or impossibility), rather than sticking to the wishful thinking which believes that for them to happen it is enough to want them. Humanity exists neither as a dust cloud of separate individuals nor as a unified world political community. It exists fragmented into distinct finite wholes, the forms of which have varied considerably throughout history – the nation-state being only one among many, and certainly not the last. What are the forces that produce this fragmentation, engender such groupings and prevent them from being perfectly horizontal, but also lead them to disappear, merge, or change form? It is questions such as these that this book explores, drawing on Spinoza’s political philosophy and especially his two central concepts of multitudo and imperium.

Living Free of?

Institutions, police, labour money

Frédéric Lordon

In this short interview book, Frédéric Lordon shows how the intellectual conjuncture reflects this *Zeitgeist* and provides the rationale behind it – notably through a close reading of the works of Deleuze, Badiou, Rancière and, most of all, Agamben. Lordon argues that all these discourses boil down to cutting the heart of politics itself. In demanding that emancipation be at distance from any collective exercise of power, Agamben's politics gives little space for agency, deliberation, and decision. Restoring the true meaning of collectives, Lordon shows how inescapable it is to govern the commons, although this constructive dialogue outlines a most urgent point of agreement: the vital need for a radical critique of the capitalist State and police apparatus.

Figures of Communism

Frédéric Lordon

A decade ago, a handful of the world's most prestigious radical philosophers organized memorable events to relaunch the "Communist hypothesis". It is now our task to make it more than a mere hypothesis, a coherent program. In this essay, French philosopher and economist Frédéric Lordon shows how urgent it is to fulfil this promise. Global warming, increasing poverty, neofascisms, State racism, constitute all in themselves a threat to humanity. But Lordon argues that we cannot expect the people to give a blank cheque to radical intellectuals and parties after the tragedy of Soviet and Eastern bloc experiences. That is why, unless communists lay down their project of society, and elaborate their strategy to go from A to B, they are likely to be ignored by workers and the oppressed. Rather than complaining about the overwhelming influence of reactionary media on poor people's brains, Lordon proposes a clear blueprint for socialist construction and radical reform. The system he argues for is a very original combination of generalized self-management, forbidding capital accumulation while retaining market mechanisms, with a general regulation of wages and social security as an investment fund.

This book provides a very complete ABC of why we should transcend capitalism and how socialism might work. A timely intervention when younger generations get increasingly aware that neoliberalism needs to be overcome for the sake of humanity.

From Canguilhem to Foucault, The Power of Norms

Pierre Macherey

Where do these norms come from? From where do norms derive their power? From lived experience, explains Canguilhem. From something that could be called History, according to Foucault. How did experience and history come to merge, in practice, their respective actions? That question is the focus of these two key authors of the latter half of the twentieth century, who engaged in a constant dialogue going on between them. Five studies, composed between 1963 and 1993, give an account of the way Canguilhem and Foucault developed the thematic of norms – an innovation whose importance is universally recognized today.

Pierre Macherey offers us in this book a fascinating long-view perspective on the question by exploring and comparing the views of classical philosophers (Kant, Hegel, Heidegger), critical theorists in the social sciences (Lacan, Bourdieu, Passeron) and writers (Rabelais, Hardy, Hesse, Nabokov). With such a critical distance, Macherey's rigorous and penetrating reflections allow us to assess the transformations and resistances currently underway in higher education with a wiser, more objective eye that does not seek to gild the university with nostalgia or self-satisfaction.

The radicality of French Enlightenment cannot be overstated, as its political quiescence never amounted to a resigned wisdom (in the way of Kant), but went along a deeply polemical and satirical denunciation of the existing state of things. Chronologies of the Present

Sylvain Lazarus

Is it possible to think emancipatory politics without the concepts of class, party, revolution? Without lapsing into liberal varieties of anti-marxism, Sylvain Lazarus is committed to a renewal of our understanding of emancipation after the end of communist revolutionary processes. Among radicals, the author contends, the question is often put in the wrong way: instead of asking why they fail to win majorities among the people, they should inquire into the masses' (les gens) own original forms of thinking. According to Lazarus, a politics without parties or classes will find its proper distance from the State as soon as it experiments collective thinking about what governments do to their people. This book is a practical handbook to build networks of inquiries (enquêtes) and experiments among the people, for the people, where thinking is less a matter of vindicating dignity in the face of public corruption, policing and bureaucratism.

The Adventure of French Philosophy Alain Badiou

Edited by Bruno Bosteels

Over forty years of French philosophy through the eyes of its greatest living exponent. *The Adventure of French Philosophy* is essential reading for anyone interested in what Badiou calls the “French moment” in contemporary thought. Badiou explores the exceptionally rich and varied world of French philosophy in a number of groundbreaking essays, published here for the first time in English or in a revised translation. Included are the often-quoted review of Louis Althusser's canonical works For *Marx and Reading Capital* and the scathing critique of “potato fascism” in Gilles Deleuze and Félix Guattari's *A Thousand Plateaus*. There are also talks on Michel Foucault and Jean-Luc Nancy, and reviews of the work of Jean-François Lyotard and Barbara Cassin, notable points of interest on an expansive tour of modern French thought.

Guided by a small set of fundamental questions concerning the nature of being, the event, the subject, and truth, Badiou pushes to an extreme the polemical force of his thinking. Against the formless continuum of life, he posits the need for radical discontinuity; against the false modesty of finitude he pleads for themathematical infinity of everyday situations; against the various return to Kant, he argues for the persistence of the Hegelian dialectic; and against the lure of ultraleftism, his texts from the 1970s vindicate the role of Maoism as a driving force behind the communist Idea.

Since the inception of the “War on Terror,” Israel has become increasingly important to Western imperial strategy and ever more aggressive in its policies towards the Palestinians. A key ideological weapon in this development is the cynical and unjustified accusation of “anti-Semitism” to silence protest and dissent. For historical reasons, this tactic has been deployed most forcefully in France, and in the first of the two essays in this book French writer Alain Badiou and Eric Hazan demolish the “anti-Semitism is everywhere” claim used to bludgeon critics of the Israeli state and those who stand in solidarity with the banlieue youth.

Forgetting Camus

Olivier Gloag

Foreword by Fredric Jameson

Perhaps no other French philosopher and novelist is more celebrated than Albert Camus. His perspective on human life and history as an absurd and tragic condition has proven well-suited to a moderately humanistic ideology and the liberal, compassionate stance of our cultural elites. Olivier Gloag boldly breaks the soft consensus and, in this incisive and provocative essay, provides a detailed and didactic deconstruction of Camus as a contemporary “idol”. Beyond the myth of a committed and yet “reasonable” intellectual, Gloag questions the “in between” position of the one who represented Algeria by erasing the indigenous Algerian population from his novels. He also brings to light an often sidelined aspect of Camus’ existentialist avoidance strategy: the latter’s investment in a toxic form of masculinity and his objectification of women. In an age when postcolonial theory and gender studies reign supreme in the humanities, this pulling down of Camus’ statue proves to be highly groundbreaking and more than timely.

Balzac, Paris Eric Hazan

No other French writer has generated more social commentary than realist novelist Honoré de Balzac. From Roland Barthes to György Lukacs, Balzac has always fascinated critical thinkers for his uncompromising and sharp portrayal of the old upper classes’ demise and the ascendancy of an affairiste bourgeoisie. In this new study, Eric Hazan revisits this venerable tradition through a circumstantial reconstruction of Balzac’s Paris. In keeping with his widely acclaimed *The Invention of Paris*, Hazan dwells on numerous spatial details of Balzac’s life and colossal masterpiece *La Comédie humaine*, to convey the political and symbolic geographies the novelist brought to life. The outcome tempers considerably the idea of Balzac as a social realist: noticing the absence of the Paris prolétaire, the author depicts Balzac’s Paris as a literary re-creation, both as an area of moral dissolution and as a spatial utopia.

Paris, Regardless Jean-Christophe Bailly

Has Paris, the “capital of the 19th century” (Walter Benjamin) become a mere museum-city, a city of power from which the people are excluded? From the blatant destruction of entire neighborhoods in the past to a subtler yet pervasive form that commodifies sections of the city for capitalist display, a battle unfolds. Amid this, there exists another Paris, unbothered by conventional heritage, thriving as a space for daily experimentation. Paris, regardless encapsulates this struggle through 37 brief chapters, each a journey through districts, disasters, and marvels. It’s a tale of moving from despair to joy, from indignation to amazement—an ongoing narrative between a city embracing imposed lessons and one reinventing itself from its historical essence.

Dynamics of Rebellion On past insurrections and others to come Eric Hazan

Eric Hazan provides a radically unconventional narrative. Contrary to all talks of a vanguard party, insurrections break out when unexpected, he shows. Even more: in each revolution, so-called “revolutionary parties” have always been off the mark, trying to bring the movement back in the bosom of parliaments, assemblies or “popular fronts”. Hazan’s alternative is sketched in a vivid and sensible assessment of a variety of revolutions: through the examples of the Paris Commune of 1871, the Shanghai Commune of 1967, the Russian revolution of 1917, the Spanish revolution of 1936-1937, the German revolution of 1919, and the zaptistas, the author shows that successful insurrections entail fed up people who start a movement, military conspiracies (revolutionary committees of a handful of individuals) and defections among repressive forces.

First Revolutionary Measures Eric Hazan & Kamo

When political leaderships in the West collapse, it will be essential for the people that they put communism immediately on the agenda. This book is a short introduction about what is to be done in the aftermath a regime’s demise: how to prevent any power from restoring itself and how to reorganize society without a central authority and according to people’s needs. Small-scale production, massive reduction of work, delocalized and grassroots restructuring of healthcare, transports and industry, abolition of wage work: such are the steps that *First revolutionary measures* unfolds in a practical manner.

A People's History of the French Revolution

Eric Hazan

A bold new history of the French Revolution from the standpoint of the peasant, workers, women sans culottes.

“A luminous book ... resurrecting, day by day, week by week, the essential moments of this singular epoch, where the most unbridled enthusiasm, tragedy, courage, treachery mingle together ... an account capable of dispelling the boredom of previous conflicting accounts. With this book, with its multiple focal points and perspectives, which allow the clamor of the French Revolution to be heard ... a new momentum is found.”

MARIANNE

“A People's History of the French Revolution chronicles the 1789 upheaval in all its guillotine gore and popular fury ... The combination of bottom-up testimony with quick authorial intelligence lends the history a vivid immediacy.”

Robespierre

Georges Labica

Whether it be about war and peace, revolutionary government, social justice, politics and religion, Robespierre's contribution has been the first philosophical thought of the Revolution as a whole political sequence. In a time when the politics of truth and the philosophy of the event have an undeniable audience, Labica's study remains indispensable to an understanding of the contemporary significance of Robespierre's life and work.

In Defence of the Terror

Liberty or Death in the French Revolution

Sophie Wahnich

In this succinct essay, Sophie Wahnich explains how, contrary to prevailing interpretations, the institution of Terror sought to put a brake on legitimate popular violence—in Danton's words, to “be terrible so as to spare the people the need to be so”—and was subsequently subsumed in a logic of war. The Terror was “a process welded to a regime of popular sovereignty, the only alternatives being to defeat tyranny or die for liberty.”

“With admirable concision and a sovereign command of the relevant literature, Enzo Traverso makes a powerful case for embedding the Holocaust in the larger narrative of the Western history, rather than seeing it as an ineffable aberration. The Revolution Betrayed

Napoleon Bonaparte and the Society of Property Owners

Marc Belissa, Yannick Bosc

The bicentenary of Napoleon Bonaparte’s death has given rise in France to a series of tributes from the political class and the media praising the merits of this ‘builder’ and ‘strategist’ who restored order after the Revolution. Against such glorification this book shows the conditions under which Bonapartism was imposed and its heavy legacy on French institutions: the confiscation of democracy, the reign of experts, police surveillance, patriarchy, the omnipotence of landlords and more. It also reminds us why, outside the borders of France, the name of Bonaparte remains associated with a disastrous military adventurism that sought to impose his yoke on the peoples of Europe, by a bloody colonial reaction and the re-establishment of slavery.

From Resistance to Civil War in Greece

1941-1946

Joëlle Fontaine

The story of the heroic resistance to Nazi occupation led by the Communist inspired EAM(National Liberation Front) and its army, the ELAS, is too often forgotten. In the zones controlled by these forces, popular committees ruled and social reforms were carried out, for a horizon other than a simple return to the status quo ante seemed to be opening up once the fascists had been expelled. But the partisans found themselves fighting against the occupying forces and the pro monarchist property-owning classes which were determined to see their previous privileges restored. Plus, the British were on the scenes, acting as arbiters but actually plotting for a restoration of the monarchy. Once the Nazis had been defeated, the façade of unity disintegrated and the nation was split in two.

Jewish Berbers

Julien Cohen-Lacassagne

With a foreword by Shlomo Sand

It is often thought that Jewish people have, since the destruction of the Temple, been an exiled people, and most Jewish descent stemmed from this early diaspora. On the contrary, as award-winning Shlomo Sand (who authors a foreword for this book) has consistently shown, Jewish people did not hesitate to convert other people. In this pathbreaking book, Cohen-Lacassagne debunks one of the most entrenched myths about Jews in the mediterranean: the idea of Sephardic-Jewishness. Reframing Jewish identities represents a timely intervention in a world where it seems more urgent than ever to recall Jewish affinities with Arabic-Berber communities in the long history of the mediterranean. “Judeo-christianity” is, in fact, far less a thing than Judeo-islamity.

A Common State

Between the River Jordan and the Sea

Eric Hazan & Eyal Sivan

“Hazan and Sivan begin with an uncontroversial statement: the two-state idea, which appeared for the first time in 1937 has got nowhere. They ask the question: what is a supposed ‘realistic’ solution that has failed for 75 years? Is it not time to make a U-turn, abandoning a failed “realism” to embrace an untried ‘utopia’?” *POLITIS*

A Legitimate Boycott

For a Cultural and Academic Boycott of Israel

Eyal Sivan & Armelle Laborie

This book is a defense of a strategy of cultural boycott, in regards with new tactics of «branding Israel». Contrary to pro-Israel legal advice, the authors demonstrate that a cultural boycott of Israel does not constitute a discriminatory policy. Individuals, whatever nationality, are not targeted. What is needed is a boycott of the cultural and academic institutions that either whitewash illegal occupation, or directly collaborate in a particularly brutal and militarized state violence. Lucidly, vividly and with unfailing rigor, the authors (one of them an anti-occupation Israeli filmmaker) reclaim the legacy of successful non-violent strategies and show how effective they can be in the current situation.

“We founded La fabrique in 1998. “We” being a group of friends, including philosophers, historians, publishers, who shared a desire to work together toward publishing books on theory and action. Our intention is that these books be politically engaged, but free from any sectarian bent, as well as from any group or party allegiance. These are philosophical texts, texts on history or analyses of our times. From France or from elsewhere, contemporary or classic, famous or very young, the authors are among those who question the ideology of domination. La Fabrique is still a small voice.

We hope and trust it will be heard.”

Eric Hazan, founder-director of éditions La fabrique

Introduction to Eric Hazan

“Amid the intellectual murkiness of the European scene, a few bright flames are burning: as witness the work of Eric Hazan. Founder-director of Editions La Fabrique, since 1998 he has published a steady stream of radical and imaginative works, notably translations of dissident Israeli and Palestinian writings. Over the last six years he has produced four books of his own, among them *L’Invention de Paris* (2002), *Chronique de la guerre civile* (2004) and *Changement de Propriétaire: La guerre civile continue* (2007) – extracts from which are reproduced below. Hazan was born in Paris in 1936, and trained as a medical student. Briefly a young Communist militant he broke with the Party in 1956 – not over Hungary, but Algeria: a pcf that disavowed its Arab comrades, and expelled militants arrested for supporting the fln, was no longer the Party of the Resistance. Hazan joined a trickle of doctors in counter-flow to the mass exodus of French professionals from Algeria in 1962, working as village medic. In 1970, he helped form the Franco-Palestinian Medical Association and served as a volunteer doctor in a refugee camp outside Beirut. The shift to publishing came in 1983, when he took over his father’s art house, Editions Hazan; forced into a deal with Hachette 15 years later, he broke free to set up La Fabrique. A rare figure in France to speak out in trenchant terms – “a duty as a Jew” – against the overwhelming official consensus on the Middle East, Hazan has eloquently analysed the ways in which traditional French antisemitism, inadmissible after the collaboration with Nazism, has been “delegated” to the descendants of the colonized, while traditional French racism has found new expression in attacking the latter for a media-inflated judeophobia. In his work, the metaphor of a “world civil war”, its frontlines everywhere, also takes concrete form in the state coercion of the banlieue, the slums, the imperial warzones. His writings assemble collages – fragments of time, scenes from the street – in an attempt to recompose the totality which the operations of the liberal-democratic media work to disperse. Hazan has described his programme as putting Rancière’s notion of “the equality of anyone with anyone” into practice. The views of a singular internationalist, informed by a broad historical culture.”
